SOLAR PANEL ROOF & RACK MOUNTING KIT

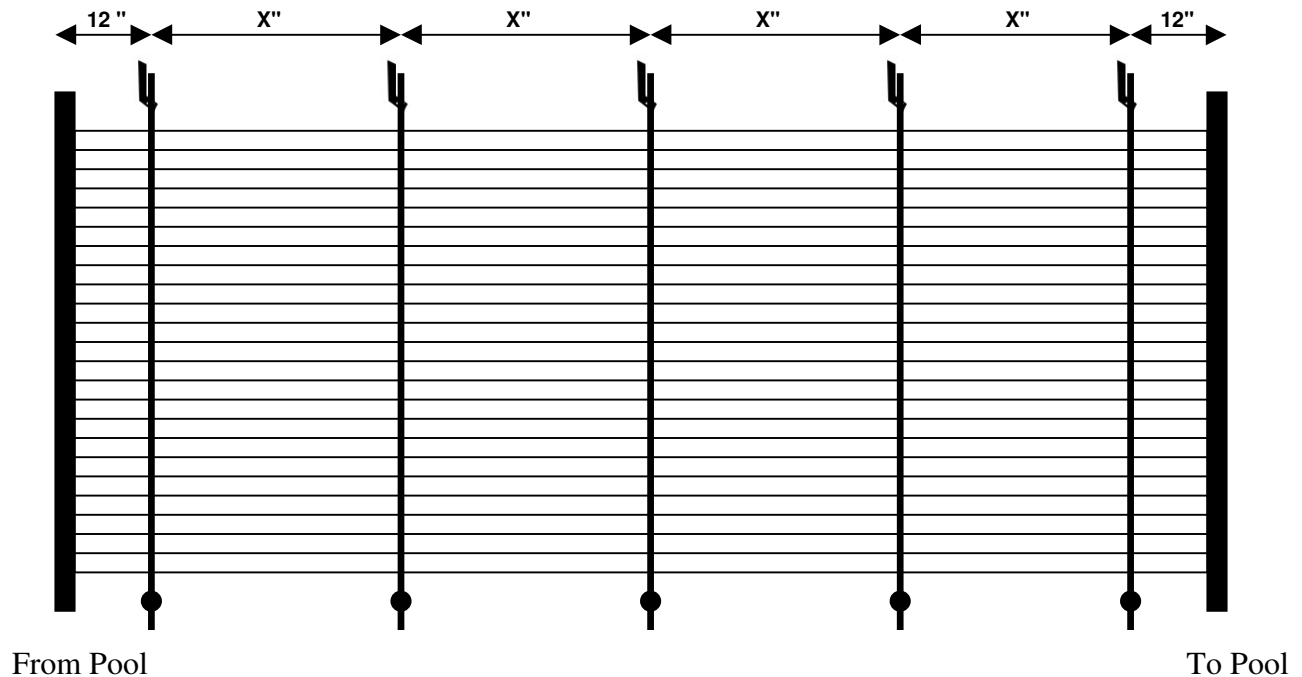

From Pool   To Pool

Contents :
5 Tie down brackets
5 mounting bases
5 mounting caps
5 dacron straps

Required :
10 $^1/_4$" lag bolts
Silicone sealant
Drill for pilot holes
Wrench for lag bolts

Instructions :
1. Place the panel on the roof allowing at least 1ft all around to work. **DO NOT WALK ON PANEL**
2. Drill 5 pilot holes on each side of the panel. The first and last holes should be 12" from panel headers and the other 3 holes spaced out evenly (see above diagram)
3. Apply silicone in hole and screw in 5 tie down brackets at the top of the panel
4. Apply silicone in hole and screw in 5 mounting bases at the bottom of the panel
5. Thread the strap through the tie down bracket and tie it off.
6. Run the strap across the panel and secure with mounting caps. **HAND TIGHTEN ONLY**
7. At the end of the season **REMOVE THE PANEL** by unscrewing the mounting caps. Leave the mounting bases and tie down brackets attached to the roof.

USE CAUTION WORKING ON THE ROOF AT ALL TIMES
